

Gentrification

Monopolies on attention

Tax evasi**O**n

Profiling**g** everyone

Helping US drone program

Mass surv**e**illance for profit

...also contributions to NSA's programs (PRISM), "Smart City", investments in trans-humanism, automated censorship, start-up speculation, digital labour exploitation, etc.

For a decentralized future and self-determination in our lives and spaces, let's kick "Google campus" out of Kreuzberg!

Google is a bad neighbour! We oppose a "Google campus" in Kreuzberg. As part of rampant "startup-ification" of our societies and spaces, its presence would inevitably lead to increased rents, hardship in our livelihoods, displacement of the most vulnerable.

Let's expose this company and those who serve its interests, while organizing our future without them!

Working towards a symbolic victory against the "Google campus" would mean organizing in decentralized ways to decide collectively the future of our neighborhoods, our communities and our lives, online and offline.

FUCK OFF GOOGLE
